Backend: .NET Core

Projects

Website Builder

Customers can easily create their website design. They have the flexibility to choose the

layout, colors, fonts, and other style elements to match their brand or personal preferences.

Reports Phase II (Timecard)

This report allows employees to manage their Clock-In and Clock-Out records efficiently.

Employees can add new entries, edit existing entries, and delete entries as needed.

Additionally, the report provides options to print the data or export it as a PDF for easy management and record-keeping.

Website Builder New

Update new features in website builder and Access label changes. Customers can easily create their website design. They have the flexibility to choose the layout, colors, fonts, and other style elements to match their brand or personal preferences.

Reports Phase III (Timecard)

This report allows employees to manage their Clock-In and Clock-Out records. In Phase III of the Reports, access levels are introduced to ensure better control. Only business owners can make changes to all entries or add new ones, while employees are restricted to editing, adding, or deleting their own entries

Reports Phase I (Settings)

This setting page will be generated post Business Login > > Settings → Look & Feel → Photo Gallery. This page contains the following major areas: · Add business themes ,Change Overall Website Themes and Add business image, Update/delete business image.

Payroll (Gusto)

Payroll (Gusto) It allows employers to manage employee payroll, tax filings, and benefits. Gusto offers employees self-service access to their paystubs and tax documents.

Zendesk Ticket Sprints - Live Production Issue

I am currently working on live production issues. If any problems are found, I do solve them on the same day. I am working on these all module.
